Free (as in non consumerist) city

Goals

Which questions/problems/situations do you think this map is trying to address?

- Finding places to be with people without spending money
- Finding anti-consumerist resources and spaces
- Locating places to reuse and recycle

Audience

What group(s) of people would benefit the most from using this map?

- Newcomers to an area
- People wanting to reduce consumption
- People wanting to save money (e.g. experiencing economic hardship)
- People wanting to socialise for free
- People who love charity shops
- People who feel isolated (migrants, elderly, new parents)
- Policy makers wanting to create community spaces in "cold spots"
- People with mobility disabilities

Example use

How do you see your map being used?

- As someone who needs to save money, I want to find places where I can have social interactions and opportunities for socialising.
- As a person with mobility issues, I need to rest without spending money (e.g. pubs, coffee shops)

Sketch/Drawing/Image

How are you envisioning the map to look like at different zoom levels?

Map Features

What features are most important to your map?

- Amenities:
  - Recycling hubs
  - Charity shops
  - Libraries
  - Communal compost areas
- Activities
  - Formal/informal book-swap sites
  - Places offering free access to activities
  - Free activities(e.g. Parkruns)
- Places/areas
  - Places for foraging fruits
  - Unofficial areas for leaving/picking up stuff (furniture, books, household items)
  - Outdoor areas to socialise for free
- Community resources
- Other:
  - Benches
  - Covered places to shelter from the rain
  - Water fountains
  - WC

Map Anti Features

What is not important to your map?

- Hotels, restaurants, caffes, pubs
- Shopping centres
- Tourist sites
- Other corporate sites

Design Considerations

What kind of design will make your map work best? eg Styles,Colours, size, shapes, icons

- A key with different icons and colours for different elements

Inclusive cartographies workshop series is part of the ESRC's Digital Good Network Project:
Can Digital Goods be Neutral? *Evaluating OpenStreetMap's Equity Through Participatory Data Visualisations*
