

Inclusive Mapping Workshop: Creating a Design Brief

Centre for Interdisciplinary Methodologies (University of Warwick)

Livingmaps Network

“

LIVINGMAPS NETWORK

Livingmaps Network was established in 2013 as a network of researchers, community activists, artists and others with a common interest in the use of mapping for social change, public engagement, critical debate and creative forms of community campaigning.

Barbara Brayshay

Barbara Brayshay is a Researcher in the Department of Geography, Royal Holloway University of London working on the AHRC-funded project *The Oral History of the Environmental Movement in the UK 1970-2020* (OHEM). She has a PhD in Bioarchaeology and Environmental Change and over 15 years research experience in community informatics and community development research, focusing on participatory mapping as a tool for community engagement and consultation. Her research ethos is grounded in Participatory Action Research (PAR) principles and practice. Aims include

Mike Duggan

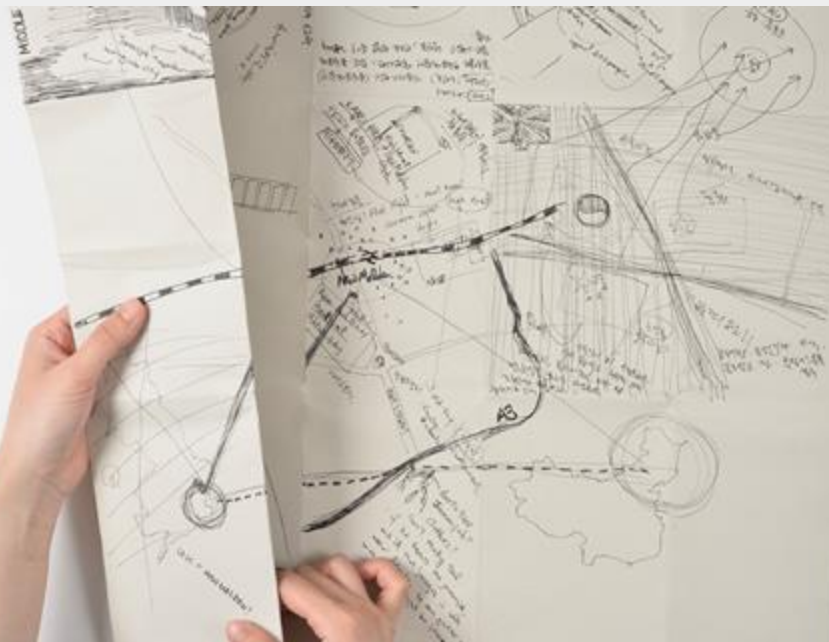

Mike works in the Digital Humanities Department at King's College London. He holds a PhD in Cultural Geography from Royal Holloway University of London, working in partnership with the Ordnance Survey on studying everyday digital mapping practices. His research is primarily interested in the tensions and contradictions that emerge when we examine how digital society and technology is theorised alongside how everyday life is lived. This has manifested in research about digital mapping practices, counter and radical cartography, and the

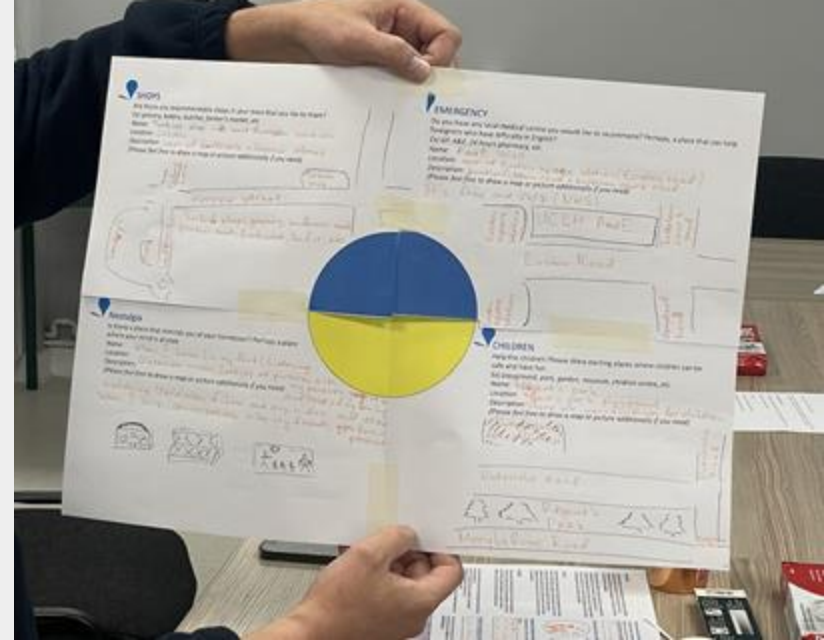

Jina Lee

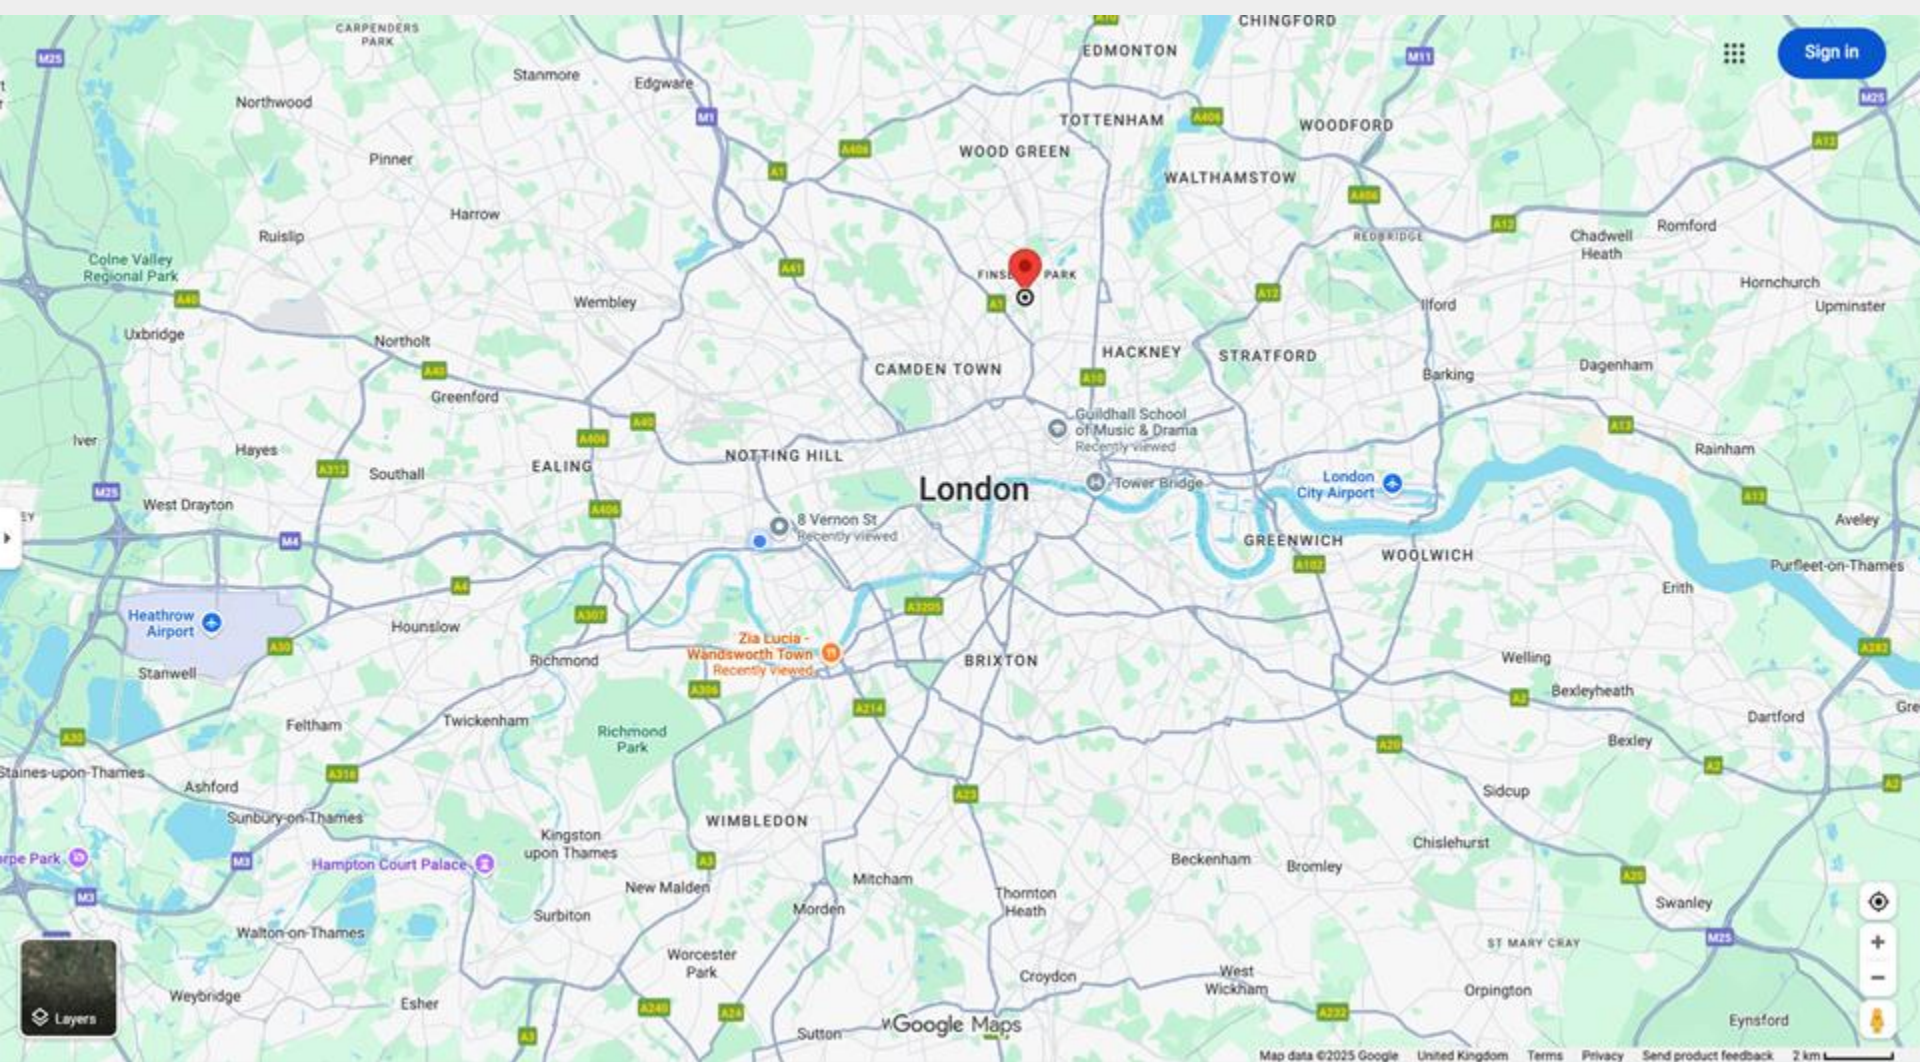

Jina holds a PhD from University of the Arts London and is currently an artist and researcher whose work operates at the intersection of critical mapping, drawing practices, and participatory methodologies. Her research investigates how mapping can be mobilised as an embodied, situated, and relational practice that foregrounds subaltern and migrant perspectives, challenging the dominant epistemologies through which space and territory are typically represented and governed. It is to extend how critical cartographic practices can reimagine

TalkingMap

Our aim today is to work together to develop innovative solutions and ideally create several design briefs tailored to your specific requirements or those of diverse personas, particularly individuals from underrepresented communities.

Who are you?

Where do you frequently go?
(place on the map)

What does this map not represent?

Name of the Map:

Goals

Which questions/problems/situations is your map trying to address?

Audience

What group(s) of people would benefit the most from using this map?

Example use

How do you see your map being used?

Name of the map: London's Cycling 'Super Highways'?

Example map by [Dermot Hanney](#):

Goals

Which questions/problems/situations is your map trying to address?

simple, clear, map London's main cycling routes

speculate about what a 'cycling friendly' London could look like

see cycling as equal to other public transport

Easy understandable and digestible

Map Features

What features are most important to your map?

Cycling 'super highways'

Links to other public transport

Area names to locate ourselves

Parks and squares + water bodies

Map Anti-Features

What is not important to your map?

Buildings

Shops and amenities

Tourist attractions

cycling 'unfriendly' roads and routes

Audience

What group(s) of people would benefit the most from using this map?

Londoners who are already familiar with the city's geography

cyclists who could use this map like an underground map

Policymakers and activists advocating for cycling infrastructure

Example use

How do you see your map being used?

Deciding new cycling routes

Planning new cycling infrastructure

Promoting Active Travel

Design Considerations

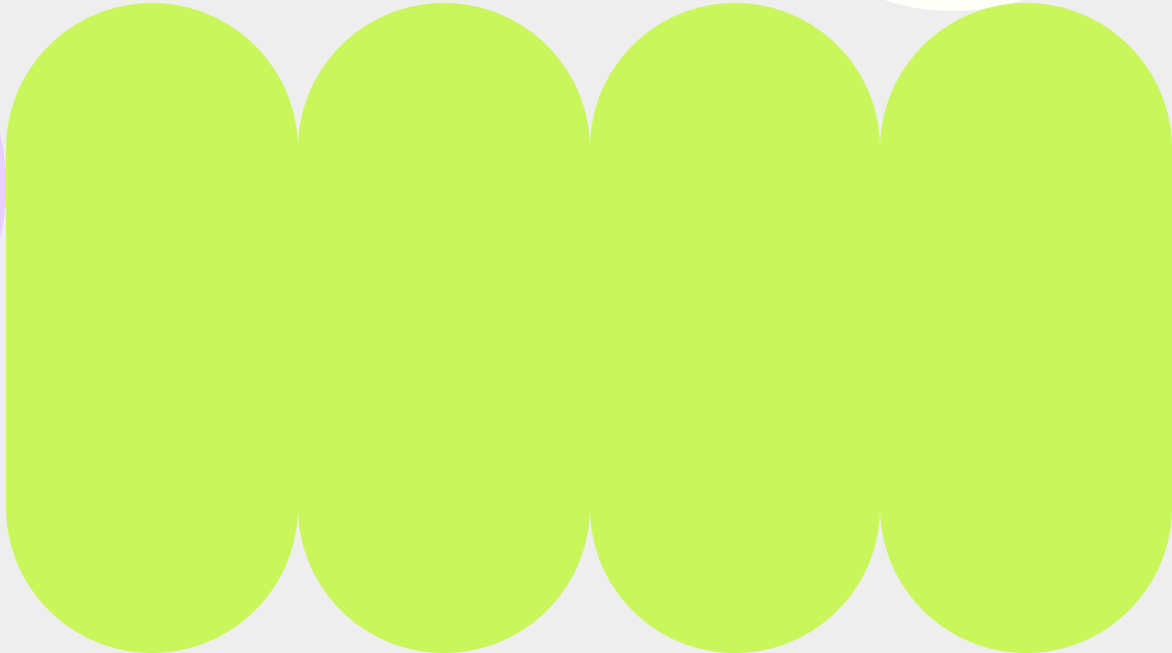

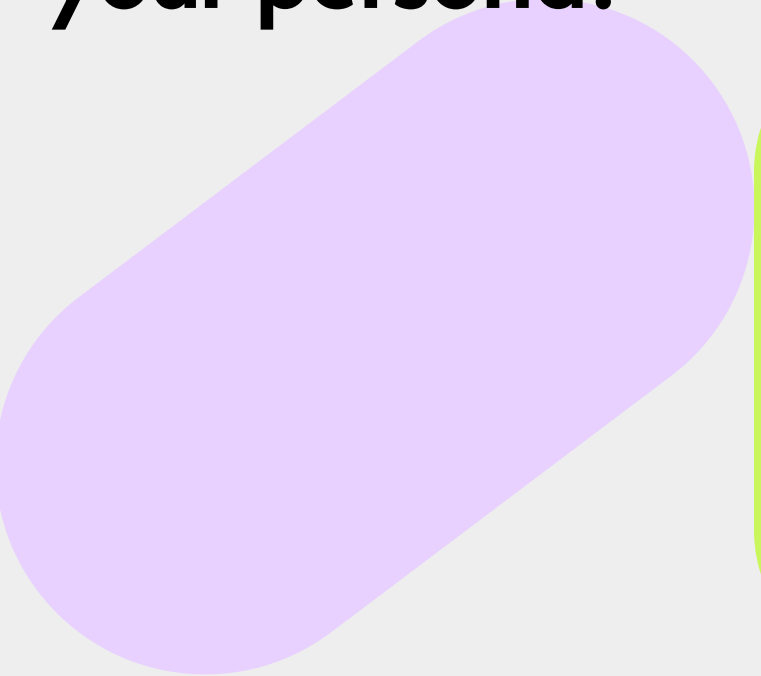

What kind of design will make your map work best?
e.g. Styles, Colours, size, shapes, icons etc...

Different colours for different lines

Line types (filled, no-fill) for different types?

Like the tube map in style but with distances preserved

**Let's think about your identity.
Alternatively, who embodies
your persona?**
